User Status Indicator

Functional Requirements

- Create multiple components `LoginTrue`, `LoginFalse`, `UserStatus` and `App`

- `LoginTrue` component returns green dot image (see notes below)

- `LoginFalse` component returns red dot image (see notes below)

- `UserStatus` component will return the appropriate Login component depending on the status of login and also the name of the user in **h2**

- You are provided an array of users and their login status

- Pass each of the user info the `UserStatus` component by mapping

- Render the `UserStatus` component inside the `App` component

```
const users = [
        { id: 1, name: 'adam', isLoggedIn: false },
        { id: 2, name: 'steve', isLoggedIn: true },
        { id: 3, name: 'dona', isLoggedIn: true },
        { id: 4, name: 'kumar', isLoggedIn: false }
    ]
```
